25X1 SATELLITE PROGRAM - NRO [REDACTED] 6 Feb 1963  
Scoville memo to D/NRO  
25X1 On 5 Feb CIA reps were briefed on [REDACTED] program, i.e. incorporation of E-6 camera  
in a THOR-assisted CORONA system.  
Stated objectives: to determine usefulness of 6-1/2' resolution photography  
for survey purposes, and to check out E-6 camera system from which photography  
never yet recovered.  
Appeared LANYARD shld provide on much earlier time scale both stereo and mono  
coverage in approx 6' resolution to satisfy first purpose; second objective did  
not appear important since no planned follow-on use for E-6 camera.  
25X1 Recommended against approval of [REDACTED]
